The Data *Fashion* Brief

Decoding fashion through data.

photo

Where the runway meets the spreadsheet: fashion trends decoded with numbers, not vibes.

I decode fashion through data: brand deep dives, catwalk analysis, and trend debriefs. Everyone talks about fashion — I talk about it objectively, backed by data, and share my opinion as a trusted voice in the industry. I work in growth marketing strategy at Farfetch, previously YOOX NET-A-PORTER Group and Zara.

Based in **London** · Writing for FashionUnited, featured by Lyst

> *"Your newsletters are always on point. They show and summarise what I see and sense when I look at social media, and you grasp it and make a conclusion about what it is that I am seeing."*
